Objective

Looking for a junior or entry-level role in Frontend or Full Stack Development, where I could use and expand my knowledge of the following stack: JavaScript, React.js and Node.js and utilise my professional business experience and skills that I gathered in other fields of work.

Work experience

Yoga Instructor

2020.08 - 2021.10 – Budapest

I was teaching yoga at group and private classes as a Certified Yoga Instructor. I used my communication and coaching skills to help my students improve their practice of various mental and physical exercises.

Customer Service Representative - Arrow Electronics Hungary Bt., Budapest
2019.02 - 2020.04

I managed the order to invoice process for UK customers, including one of the top 5 clients of our division. With proactive order management and high level attention to the client's needs, we achieved over 80% increase in sales to this client within one business year.

Logistics Coordinator - Kwizda Agro Hungary Kft., Budapest
2016.06 - 2018.05

As the only person responsible for the overall purchasing and logistics activity, I effectively managed the increasing number of suppliers and material flow, thus contributed to the company's growth in revenue from 9,5 to over 11 billion HUF.

Inventory Planner - Esab Kft. (SSC), Budapest
2012.07 - 2015.08

I ensured on-time part supply from 3rd party and internal suppliers, secured and planned inventory levels based on statistical and forecasted data. I successfully handled escalations related to line-stops and product shortages.

Arrow Electronics Hungary Bt., Budapest
After Sales & Quality Executive - 2012.01 - 2012.07

As our two-person team took over the job from another business unit, I used my process-oriented approach to re-design and implement new workflows for customer claim handling, root cause analysis and corrective action plan for our worldwide customer base.

Purchaser - 2010.03 - 2012.01

Operational purchasing and delivery management of electronic components were my main tasks. I implemented a new workaround in the ERP system for high selling items in order to follow their stock movements effectively.

I gave supplier performance reviews and participated in supplier meetings.
